ISBN: 0672322307

List Price: \$59.99

Publisher: Sams

1st edition (September 16, 2002)

Paperback: 1272 Pages

Table of Contents

Introduction	1
Intended Audience	1
Conventions	2
Learn By Example	2
Part I Overview	
1 Cocoa and Mac OS X	5
Understanding When to Use Cocoa	6
Carbon	6
Java	7
Cocoa	7
Understanding Cocoa's Role in Mac OS X	8
Quartz	9
OpenGL	10
QuickTime	10
Darwin	10
What You Need to Use Cocoa	13
What's Included in Cocoa	13
Summary	14
2 Cocoa Language Options	15
Object Orientation	16
Encapsulation	16
Modularity	17
Classes	17
Instances	17
Objects	18
Specialization	18
Inheritance	18
Messages	19
Polymorphism	19
Java	19
Automatic Garbage Collection	20
Interfaces	20

Security and Safety	20
The Java Bridge	20
100% Pure Java	21
JavaBeans	21
Objective-C	21
Categories	21
Protocols	22
Perform	22
Posing	22
Runtime	22
Other Languages	22
ANSI C and C++	23
Scripting Languages	23
Choosing a Language for Use with Cocoa	23
Java Pros and Cons	24
Objective-C Pros and Cons	25
Scripting Language Pros and Cons	27
The Use of Objective-C in This Book	27
Summary	27
3 Using Apple’s Developer Tools	29
Obtaining Apple’s Developer Tools	29
Project Builder	30
Creating a New Project	30
Building the Hello World Project	32
Running Hello World	33
Exploring the Project Pane	33
Debugging with Project Builder	36
Using Project Builder’s Find Tool	36
Interface Builder	38
Creating a New Interface with Interface Builder	39
Configuring Objects	44
Interface Builder Paradigms	52
Frameworks	59
Samples	59
Application Kit Framework Samples	60
Foundation Framework Samples	61
Interface Builder Samples	62
Additional Samples	62

Terminal	63
Other Tools	64
Summary	66
4 Objective-C	67
Why Learn Objective-C?	67
Additions to C	68
Messaging	68
File Naming and Importing	69
The <code>id</code> Type	70
Static Typing	70
Declaring a Class	71
Implementing a Class	77
<code>self</code> and <code>super</code>	78
Creating Instances	79
Apple's Extensions	80
Categories	80
Protocols	82
Type Encoding	85
Constant-String Objects	86
The <code>NSObject</code> Base Class	87
Object Introspection	88
The Introspective Format	89
Optimization	89
Object Comparison	90
Runtime Integration	91
Runtime Functions	94
Objective-C++	94
Summary	95
5 Cocoa Conventions	97
Naming	97
Prefixes	98
Capitalization and Scope	98
Underscores and Usage	99
Additional Capitalization	99
Nouns and Verbs	100
Class Names	100
Initializers	100

Managing Memory	102
Automatic Garbage Collection	102
Reference Counting	103
Retain Cycles	108
Tracking Memory Problems	108
Accessors	109
Accessing Objects	111
Using Memory Zones	113
Encoding and Decoding	115
Encoding Types	116
Retaining Decoded Objects	119
Conditional Encoding	119
Using Version Numbers	121
Using Memory Zones When Decoding	123
Substituting Objects	123
Using Alternative Techniques	123
Summary	124
6 Cocoa Design Patterns	125
Understanding Design Patterns	125
Design Pattern Terminology	126
A Catalog of Cocoa Design Patterns	127
Model-View-Controller	127
Class Clusters	131
Shared Objects	131
Enumeration	133
Target/Action	134
Commands	135
Delegates	135
Notifications	137
Proxies	138
Facades	139
Prototypes	140
Archiving and Coding	140
Subviews	141
Responder Chain	142
Summary	143

Part II The Cocoa Frameworks

7	Foundation Framework Overview	147
	Mutability	147
	Mutable Instance Variables	148
	Class Clusters	151
	Typed Storage	151
	Strings	152
	Raw Data	155
	Values	156
	Dates	158
	Collections	160
	Arrays	161
	Dictionaries	162
	Sets	163
	NSNull	163
	Enumerators	164
	Deep Versus Shallow Copying	165
	Property Lists	165
	Run Loops and Timers	167
	NSRunLoop	167
	NSTimer	167
	Support Types	168
	NSRange	168
	NSGeometry	169
	String Processing	170
	NSCharacterSet	170
	NSScanner	171
	Regular Expressions	173
	Formatters	173
	Bundles	173
	NSBundle	174
	Localization	176
	File System Access	177
	NSFileHandle	177
	NSFileManager	179
	NSFileWrapper	180
	Defaults System	180
	NSUserDefaults	182

Notifications	183
NSNotificationCenter	184
NSNotification	185
Related Core Foundation	185
Summary	187
8 The Application Kit Framework Overview	189
Events and the Run Loop	190
Responders	190
What Is a Responder?	191
The Responder Chain	192
The First Responder	193
NSApplication Overview	195
NSWindow Overview	195
Backing Store	196
Key Window and Main Window	197
Windows in the Responder Chain	199
NSView Overview	199
View Hierarchy	199
Views in the Responder Chain	201
Delegates	203
Delegation Versus Notifications	204
Specialization of Behavior and Coupling	204
Delegation Versus Multiple Inheritance	206
Limitations of Delegation	206
Target-Action Paradigm	207
Archived Objects and Nibs	209
Nib Awaking	210
The File's Owner	211
NSWindowController Overview	212
Multidocument Applications	213
NSApplication Support	214
NSDocumentController Overview	215
NSDocument Overview	217
NSFileWrapper Overview	218
Undo and Redo	218
Menu Validation	219

Spell Checking	219
Enabling Spell Checking	220
Summary	221
9 Applications, Windows, and Screens	223
The New Image Viewer	223
The Role of the MYDocument Class	224
The Role of the MYDocumentManager Class	224
Working with NSWindow	225
NSWindow's Delegate	225
Configuring the Document's Window	227
Implementing MYDocument	232
Transparent Windows	250
Working with NSApplication	250
NSApplication's Delegate	251
Creating and Configuring MYDocumentManager	253
Implementing MYDocumentManager	257
Modal Loops	272
Using Modal Windows	273
Using Modal Views	273
Working with Sheets	274
Changes to MYDocument to Support Sheets	274
Changes to MYDocumentManager to Support Sheets	280
Working with Drawers	283
Working with Screens	283
Working with Panels	284
The NSPanel Class and Subclasses	284
Summary	285
10 Views and Controls	287
Controls	287
NSControl Class	288
Relationship Between Controls and Cells	293
Simple Views and Controls	296
Buttons	296
Sliders	306
Text Fields	310
Image Display	320
Progress Indicators	323

Container Views and Controls	325
Boxes	326
Scroll Views	329
Tab Views	334
Split Views	339
Compound Controls	341
Steppers	342
NSMatrix Class	343
Forms	348
Pop-Up Buttons and Pull-Down Lists	350
Summary	353
11 The Cocoa Text System	355
Using the High-Level Text Classes	356
Setting the Text to Display	357
Appending, Inserting, and Replacing Text	357
Programmatically Ending Editing	358
The Text System Architecture	359
The Model Layer: Text Storage and Attributed Strings	361
The Control Layer: Text Layout and Containers	371
The View Layer: NSTextView	373
Managing Fonts	376
The NSFont Class	377
Using the Font Manager	379
Using the Font Panel and Font Menu	386
Text Input	388
Using Delegate Methods	389
Using Formatters	393
Summary	402
12 Custom Views and Graphics Part I	403
The Quartz Graphics Model	404
Resolution Independence	404
Device Independence	405
Transparency	405
Paths	405
Transforms	406
Bitmapped Images	406

Graphics Contexts	407
Text Rendering	407
Quartz Graphics Via the Application Kit	407
New Types and Functions	408
Subclassing NSView	413
Using the NSBezierPath Class	418
Constructing a Path	420
Rendering a Path	434
Drawing Shortcuts: Rectangle Functions and More	443
Modifying Drawing	450
NSBezierPath Parameters	450
Querying and Modifying a Path	457
Summary	459
13 Custom Views and Graphics Part II	461
Using NSGraphicsContext	461
Where Am I Drawing?	462
Flushing a Context	462
Controlling the Drawing	464
NSGraphicsContext Advanced Methods	466
Coordinate System Transformations	468
Defining an NSAffineTransform	468
Using an NSAffineTransform	476
Expert Transforms	479
Drawing Points and Rectangles	485
Drawing Individual Rectangles	486
Drawing Lists of Rectangles	487
Drawing with Bitmaps	489
Optimizing Drawing	496
Finding Drawing Trouble Spots	498
Easy Optimizations	503
Controlling Display and Flushing	506
Caching Complex Drawing	509
Custom Buffering	511
Other Optimizations	515
Summary	519

14	Custom Views and Graphics Part III	521
	Images and Bitmaps	521
	Compositing	521
	The NSImage Class	526
	Manipulating Image Representations	548
	Drawing Text	569
	NSString Drawing Methods	569
	NSBezierPath and Glyphs	574
	Summary	582
15	Events and Cursors	583
	Event Handling in Custom NSView Subclasses	583
	Accepting First Responder Status	584
	Detecting Changes in First Responder Status	586
	First Mouse Clicks	587
	Controlling Key Status and Window Ordering	588
	The NSEvent Class	589
	Handling Mouse Events	595
	Handling Key Events	601
	Other Events	606
	Managing Cursors	612
	NSCursor Class	612
	Cursor Management	616
	Changing the Cursor	617
	Summary	625
16	Menus	627
	Standard Menu Layouts	628
	Menu Support in Interface Builder	628
	Menu Support in the Cocoa APIs	630
	NSMenu Class	630
	Creating an NSMenu.....	631
	Adding Items to an NSMenu	631
	Removing Items from an NSMenu	632
	Finding Items in an NSMenu	632
	NSMenu Notifications	633
	Other NSMenu Methods	634
	NSMenuItem Class	634

Creating an NSMenuItem	635
Configuring an NSMenuItem	636
The DynamicMenu Example	639
Menu Validation	642
Implementing the -validateMenuItem: Method	643
Disabling Automatic Validation	644
Contextual Menus	644
Dock Menus	646
Extending the Dock Menu Without Code	647
Extending the Dock Menu with a Delegate	648
Deprecated Functionality	649
Summary	650
17 Color	651
NSColor Class	651
Creating Color Objects	652
Setting the Current Color	654
Querying NSColor Settings	654
Visually Representing an NSColor	656
Color Space Conversion	656
Creating Derived Colors	657
System Color Values and Notification	660
Storing and Retrieving Colors	660
Color Wells	661
NSColorWell Class	661
Color Panels	663
NSColorPanel Class	663
Dragging Colors	666
Customizing the Color Panel	667
Custom Color Pickers	667
NSColorList Class	671
Summary	673
18 Advanced Views and Controls	675
NSTableView, NSOutlineView, and NSBrowser Concepts	675
Data Sources	676
Selecting an Appropriate User Interface	677
Terminology Used with Hierarchical Data	678

Table Views	679
Setting Up an NSTableView	680
Custom Formatting the Cells in an NSTableView	684
Master-Detail Interfaces with NSTableView	688
Outline Views	696
The Outline Table Column	697
NSOutlineView Data Sources	698
NSOutlineView Delegate Methods	702
Other NSOutlineView Methods	703
Browsers	704
Configuring an NSBrowser in Interface Builder	705
Important NSBrowser Methods	707
NSBrowserCell Class	709
NSBrowser Delegates	709
ClassBrowser Example	712
Combo Boxes	718
Combo Boxes in Interface Builder	718
Other Combo Box Methods	719
Managing a Combo Box Item List	720
Selecting an Item Programmatically	721
Combo Box Delegate Methods	723
Custom Controls	723
Subclassing NSControl	724
Subclassing NSCell	725
Control Tint	730
Toolbars	730
NSToolbar Class	731
Creating an NSToolbar Delegate	735
Toolbar Item Validation	738
Status Bars	739
Working with NSStatusBar and NSStatusItem	739
StatusItems Example	741
NSQuickDrawView Class	743
Summary	744
19 Using Pasteboards	745
Pasteboard Concepts	745
Pasteboard Server	746
Pasteboard Data Types	746

Lazy Evaluation	747
Services	747
Filters	749
Implementing Cut, Copy, and Paste	749
Obtaining a Pasteboard	750
Pasteboard Types	751
Filtering an NSPasteboard	752
Writing Data to an NSPasteboard	752
Providing Data Lazily	754
Reading Data from an NSPasteboard	756
Implementing Drag and Drop	758
Drag and Drop in Custom View and Window Objects	758
Drag and Drop for Table and Outline Views	767
Implementing Services	772
Using Services	773
Invoking Services Programmatically	776
Implementing Service Providers	777
Summary	788
20 Adding Online Help	791
Apple Help	791
Integrating a Help Book into Your Application	794
Extending Help Functionality Using Carbon	796
ToolTips	805
Using Interface Builder to Set ToolTips	806
Cocoa APIs for ToolTips	806
Context-Sensitive Help (NSHelpManager)	811
Summary	811
21 Multimedia	813
Sound	813
NSSound Class	813
Core Audio and Core MIDI Frameworks	815
Speech Synthesis and Recognition	816
QuickTime	816
NSMovie Class	817
NSMovieView	818

3D Graphics	822
Application Kit Frameworks	823
Procedural OpenGL	829
Summary	829
22 Integrating with the Operating System	831
Getting System Information	831
NSProcessInfo Class	831
NSHost Class	833
Users	834
Standard Locations	834
Authentication and Security	837
Set uid Cocoa Applications	838
Communicating with the Workspace	839
NSWorkspace Class	840
Summary	849
23 Networking	851
NSURL and NSURLHandle	851
Creating a New NSURL	852
Decomposing an NSURL	853
Downloading Data	856
Email Messages	859
Creating a Message in the User's Email Client	859
Directory Services	862
Interapplication Programming	862
Apple Events	863
Distributed Notifications	863
Distributed Objects	866
Low-Level Interprocess Communication	879
Summary	880
24 Subprocesses and Threads	881
Choosing Between Subprocesses and Threads	881
Using the NSTask Class	883
NSTask Synchronously: Calendar Example	884
NSTask Asynchronously: Animal Example	891

Using the NSThread Class	902
The ThreadExample Program	903
Locking	916
Using the NSLock and NSConditionLock Classes	917
Using the NSDistributedLock Class	921
Threading Issues	923
Performance Issues	923
Critical Sections	924
Global Variables	925
Race Conditions	926
Deadlocks	927
Starvation	928
Debugging	929
Using NSTimers Instead of Threads	930
Summary	931
25 Printing	933
Basic Printing	933
Overview of the Printing Classes	934
NSPrintInfo	934
NSPrinter	939
NSPageLayout	939
NSPrintPanel	942
NSPrintOperation	943
NSView's Printing Support	946
Additional Printing Features	947
Printing and Pagination Example	948
AutomaticPagination	949
CustomPagination	958
AlternativePagination Technique	960
Printing in NSDocument-Based Applications	961
NSPageLayout Interaction	962
Printing Documents	963
Summary	964

Part III Cocoa Techniques

26	Application Requirements, Design, and Documentation	967
	Designing an Application with Requirements	968
	Describing the Goal	968
	Deriving Requirements from a Description	969
	Selecting an Architecture	972
	Designing TransparentTetris	972
	TransparentTetris Model	973
	TransparentTetris View	981
	TransparentTetris Controller	983
	Implementing the Design	985
	MYSubBlock Class	986
	MYBlock Class	988
	MYGameModel Class	1001
	MYGameController Class	1022
	Using AutoDoc	1036
	Summary	1037
27	Creating Custom Frameworks	1039
	Creating and Using a Framework	1040
	Install Location	1040
	Prebinding	1041
	Building a Custom Framework	1043
	Using a Custom Framework	1043
	Header Files	1044
	Precompiled Headers	1044
	Public Versus Private API	1045
	Providing Backward Compatibility	1047
	Debugging Frameworks	1048
	Summary	1049
28	Distributing Applications	1051
	Package Directories	1051
	Using Disk Images	1052
	Creating a DMG Using Disk Copy	1053
	Creating a DMG File from the Command Line	1056
	Customizing DMG Archives	1057

Application Installation	1058
Drag in the File System	1059
Installer	1059
Third-Party Installers	1061
Summary	1062

Part IV Appendixes

A Unleashing the Objective-C Runtime	1065
Objective-C Objects	1066
The isa Element	1066
Extra Bytes	1066
Class	1067
Messaging with IMPs and Selectors	1072
Searching for a Method	1074
Common Runtime Functions	1075
Forwarding, Distributed Objects, and Proxies	1076
Examples	1077
Get a List of All Classes	1077
Get a List of All Instance Variables	1078
Get a List of All Methods	1079
Store the IMP for a Replaced Method	1079
Access Any Class From a Scripting Language	1084
Summary	1085
B Optimizing and Finding Memory Leaks	1087
Optimizing Applications	1087
Premature Optimization	1087
The 80/20 Rule	1088
The LotsOfWords Application	1088
First Optimize Graphics	1101
Optimizing Nongraphical Code	1109
Finding Performance Bottlenecks	1109
Optimize Only the Bottlenecks	1111
Optimizing Rules of Thumb	1116
Avoiding Dynamic Memory Allocation	1117

Finding Memory Leaks	1128
ObjectAlloc	1128
MallocDebug	1130
Using Cocoa Frameworks to Find Leaks	1130
Summary	1132
C Finding Third-Party Resources	1133
Apple-Provided Documentation	1133
Cocoa Developer Documentation	1133
Core Foundation	1134
Carbon Frameworks	1134
Developer Tools	1134
Release Notes	1134
Example Code	1135
Cocoa Sample Code	1135
Omni Group Frameworks	1135
MiscKit Frameworks	1136
MOKit Frameworks	1136
EDCommon Frameworks	1137
Web Sites	1137
Stepwise	1137
Softrak	1138
O'Reilly Mac DevCenter	1138
CocoaDev	1138
MacTech	1138
Mailing Lists	1138
cocoa-dev	1138
Project Builder	1139
macosx-dev	1139
Summary	1139
D Cocoa Additions in Mac OS X Version 10.2	1141
Quartz Extreme	1141
OpenGL Accelerated 2D	1142
Multiple Layers per Window	1142
Requirements	1142
Handwriting Recognition	1143
Address Book and vCard	1143
Universal Access	1143

Updated Tools	1144
GCC 3.1	1144
BSD Tools	1145
IPv6	1145
Updated Cocoa Spell Checking Support	1145
Framework Enhancements	1146
Summary	1146
Index	1149
